WORK EXPERIENCE

Information Technology Support Assistant
April 6, 2026 - October 28, 2026
Guzman y Gomez Singapore

Job Responsibilities

- Support business operations and reporting for GYG Singapore by maintaining, improving, and troubleshooting automated data workflows across multiple systems, including Revel POS, Tanda/Workforce, MarketMan, SafetyCulture, and Deliverect.
- Develop and maintain Google Sheets and Google Apps Script automations for operational reporting, API data extraction, scheduled data refreshes, and report consolidation.
- Key responsibilities include:
- Automating daily sales, labour, product mix, inventory transfer, inspection, and product availability/snooze reports.
- Integrating and extracting data from third-party platforms using APIs and Google Apps Script.
- Troubleshooting failed scheduled jobs, API authentication issues, rate limits, execution timeouts, missing outlet data, duplicate records, and incorrect report mappings.
- Backfilling and reconciling missing historical data to maintain accurate and complete reports.
- Building and improving Google Sheets formulas, dashboards, data validation rules, and reporting workflows.
- Validating source data and investigating discrepancies between operational systems and reporting outputs.
- Providing technical support for system access, reporting issues, automation errors, and operational data requests.
- Translating raw operational data into clear and reliable reports that support faster business and outlet-level decision-making.

Junior Technical Specialist
January 1, 2026 - May 1, 2026
DBS Digital Hub, Dubai, UAE

Job Responsibilities

- Develop and maintain scalable, user-friendly websites using GoHighLevel
- Execute full-stack development (front-end and back-end), including custom coding, debugging, and interactive animations
- Build, customize, and maintain WordPress websites, including page layouts, plugin setup, theme adjustments, debugging, and performance optimization.
- Build and manage automation workflows to streamline business operations.

- Develop and deploy AI agents and chatbots using HumanBot.io and GoHighLevel
- Integrate AI agents and systems with Zapier to automate processes across multiple applications
- Troubleshoot, debug, and optimize systems to ensure performance and reliability
- Contribute to innovation initiatives, leveraging AI and automation to enhance digital solutions
- Train, mentor, and support team members in website development and AI agent implementation

INNOVATION

Personal Record Management System (PRMS)

- PRMS efficiently handles the recording, reporting, and monitoring of personal records with a focus on data security, privacy, and reliability. It includes features like secure data storage, reporting tools, monitoring capabilities, and robust backup and recovery systems to protect and maintain personal information.

Healthcare Supplies Inventory Management System (HSIMS)

- This system tracks supplies and equipment by monitoring stock levels, expiry dates, and product categories. It includes features like returns and adjustments, inventory and usage reports, and ensures the efficient use of stock with methods like First-Expire-First-Out (FEFO) and accurate stock dispensing.
